Meeting to Amend the State Transportation Improvement Program

The Commission hereby provides notice in accordance with Section 14531 of the Government Code that it may amend the state transportation improvement program (STIP) on or after **February 23, 2010** to add projects nominated by the Department and regional transportation planning agencies for federal transportation economic stimulus funding anticipated under pending legislation (Jobs for Main Street Act of 2010 [HR 2847]).

This notice does not include specific project information because the Department and regional agencies have not yet identified and nominated the specific projects and because the Commission anticipates that the programming deadlines in federal legislation may require prompt action in order to maximize the availability of federal economic stimulus funds to California.

Questions or inquiries about this meeting may be directed to Mitchell Weiss, Commission Deputy Director, at (916) 654-7179.
